### Friends and Family Test

#### Comments received during February 2015

Feb-15	The Drs listen to you and give you time without the feeling of being rushed in and out.
	Everyone at the practice has been kind and professional and I have not had much difficulty getting an appointment when I have needed one.
	Very patient focussed & committed GPs. An SMS text 5 minutes before my actual appointment time with the GP would allow patients to walk outside instead of sitting in the waiting room
